

BALL CARE DOCUMENT 2026

NEW HYPERSEAL BALL IS FOAM BACKED
DO NOT OVER INFLATE, IT DOES HAVE A SOFT PRO FEEL
TO THE BALL!!!

- NEW BALLS BOXES OF 16, (SOME WILL BE DEFLATED) ALL BALLS TO BE FULL INFLATED 24 HOURS PRE USE
- USE A BALL GAUGE TO INFLATE TO **CORRECT PRESSURE 10-12psi MAX**
- HAND HELD PUMP & BALL GAUGE (NOT ELECTRIC.THEY ARE NOT ACCURATE)
- THESE BALLS ARE FOAMED LINED AND WILL STILL FEEL SOFT TO THE TOUCH (OR THUMB TEST) EVEN IF OVER INFLATED. **PLEASE DO NOT OVER INFLATE**
- WIPE DOWN WITH DAMP CLOTH & STORE IN A DRY AIRIATED PLACE
 - DO NOT LEAVE BALLS WET AFTER USE

Following the above guidelines will help you to get the best out of your new match ball.

Over inflation of the ball is very easy to do if this is not used.
Constant over inflation of balls can cause shape issues, this is not a fault with the ball.

The new balls are VERY DIFFERENT from balls used in the past. Please, follow the above guidelines to ensure they perform as they have been designed to do.

EXAMPLE: **MAXIMUM PRESSURE IS 12psi:**
IF YOU INFLATE TO **15 psi THAT'S 25% EXTRA INFLATION**
WOULD YOU OVER INFLATE YOUR CAR TYRES BY 25%?

THANK YOU
